Deadline for manuscript submissions:

**31 December 2021**

### Message from the Guest Editors

The Special Issue, “Nano-Engineering of Functional Oxides: Synthesis, Functional Properties and Applications”, will address developments in the smart design and advanced characterization of functional nanoscale oxide materials and devices for nano-electronics, data storage, energy conversion/storage, sensors, transducers and actuators, among other applications. Oxide nanostructures have been demonstrated to be useful functional components for a variety of nanoscale devices. This Special Issue at the interface between nanocharacterization and top-down and bottom-up nanofabrication techniques will address a variety of skills, ranging from the synthesis of 1D, 2D and 3D functional oxides nanostructures to the design of sensors and harvesting energy devices, through advanced structural and physical characterizations at the nanoscale. Thus, articles and reviews dealing with chemical and physical thin film deposition, inorganic chemistry, magnetism, piezoelectrics, ferroelectrics and multiferroics are welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

James McGill Professor,  
Professor of Biomedical  
Engineering, Professor of  
Bioengineering, Professor of  
Experimental Surgery,  
Department of Biomedical  
Engineering, Faculty of  
Medicine/Faculty of Dentistry,  
Duff Medical Science Building,  
3775 University Street, Montreal,  
QC, H3A 2B4, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

*Materials* provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed by the **Science Citation Index Expanded** (Web of Science), **Ei Compendex** and **other databases**. Citations available in **PubMed**, full-text archived in **PubMed Central**.

**CiteScore** (2018 Scopus data): **3.26**, which equals rank 97/439 (Q1) in 'General Materials Science'.
